## BUILDPRO WELDING TABLE

- Mobile Solutions is proud to announce that we are now a Master Distributor for StrongHand Tools, manufacturer of these tables. We introduced the BuildPro Welding Table to attendees of our Master Tech Boot Camp and they were simply blown away!
- Equipping your installation department with a BuildPro Welding Table will allow you to take on work that was previously not possible, allowing you to further push the boundaries on what you can offer to your customers.
- Mobile Solutions facility in Tempe, AZ is the first in the Mobile Electronics industry to have this tool at our disposal. Our Master Tech Boot Camp program teaches attendees how to put the BuildPro Welding Table to work for them in an effort to improve their efficiency at even the most difficult of welding projects. We firmly believe that the Build Pro Welding Table is to metal working what the router table is to woodworking!

**497-1713 Air Assist Canister: \$9.99**  
(2 or more) \$9.49 each

Suede-Tex fibers have the appearance and feel of felt without the extra cost or cutting. These specially treated fibers resist fading and are a great way to finish glove boxes, center consoles, or subwoofer ports. Quick and easy to use! Simply apply undercoat adhesive with a brush or roller, dispense matching color fibers with our Mini Flocker Gun, and allow to dry. Three ounces of Suede-Tex fiber and eight ounces of adhesive cover 12 - 15 sq. ft.

| Color   | Flocking                             | Adhesive                             |

Recently the attendees at our Master Tech Boot Camp program asked about buying the custom designed router tables that we use in our own facility.

#### Now you can!

We have designed and built our router tables from the ground up. We consider them to be the best of the best.

#### Specifications:

**Top:** The 24"D x 32"W Top has a weight of 45 pounds, which provides an extremely stable, flat, and true work surface.

**Steel Frame:** The top is mounted to a Steel Frame that gives the router table an overall height of 35". We custom weld each base out of steel stock. The base includes leveling feet so that set-up in your shop is a snap.

**Dust Cavity:** The dust cavity is made from white melamine and fits within the base. dust collection hook up is on the rear via your choice of a 4", 5", or 6" diameter connection.

**Safety Switch:** This mechanical push button Safety Switch features an oversized red stop paddle to quickly shut off power to your tool in an instant. When the switch is in the off position, a safety catch locks out the on button to prevent accidental starts.

The Mobile Solutions Router Table will accommodate any of the router lifts that we sell, as well as all of the most popular styles and kinds of routers, including the massive Porter-Cable production routers. This is a serious router table designed for the demands of a serious production oriented wood shop.

We custom make each Mobile Solutions Router Table IN-HOUSE – you will not find a more versatile router table available at this price!

#### MS-PRT-NC: \$499.99

Includes: Steel Frame, Top and Safety Switch  
(Dust Cavity not included)

#### MS-PRT: \$599.99

Complete Router Table (As shown)

**Note:** White Dust Cavity, Router Lifts and Routers sold separately.  
(Additional shipping & handling to the 48 contiguous US states.)  
Call for rates to Hawaii, Alaska, and International.

## Master Tech BOOT CAMP

EXTREME FABRICATION

### 3 DAYS OF PROFESSIONAL TRAINING

This program focuses 3 days exclusively on the structural, cosmetic and OEM integration of today's modern luxury vehicles. We demonstrate smart fabrication techniques and industry secrets that will enhance the way you integrate with vehicle panels and structural components.

Training is structured so that you can attend the 3-day Master Tech Boot Camp Extreme Fabrication training by arriving at Phoenix Sky Harbor Airport (code PHX) on a Friday afternoon, attending the training Saturday through Monday and then fly out Monday night. Your time away from the shop is minimal and there are no days while you are attending training that you will not be in class. This eliminates any extra hotel days or days away from the store, ultimately keeping more of your training costs down.

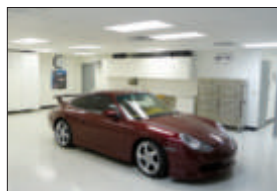

#### Why Should You Attend?

It's simple - no other non-product specific training programs are available for this industry's top level technicians that have this range of topics. This training will elevate your overall knowledge and skills to the next level. It will offer you opportunities to do better work, more reliably, with better overall results.

Stop saying no to jobs and stop underestimating the jobs you do take. No matter how good you are, Mobile Solutions Master Tech Boot Camp Extreme Fabrication training can make you better!

#### Who Should Attend This Training?

Installation managers, installation technicians of all skill levels and any shop personnel serving an installation related function.

#### Day One:

- Fiberglass Fabrication
- Table Saw Techniques
- Cutting Perfect Circles
- Plastic and Aluminum Fabrication

#### Day Two:

- Metal Fabrication
- Advanced Router Techniques
- Pin Routing (New Technique)

#### Day Three:

- OEM Integration of Audio Systems – It's the next "big" thing!
- Audio and Electrical Measurement Tools You Need
- How to approach any car with audio upgrades – a step-by-step process
- Integration products to get you the right results

**Training includes:** Comprehensive Training Manual
